Rhodesian Ridgeback Club of Qld Inc Specialty Show

8 June 2013

First of all, let me say that it was a great honour and a thrill for me to be invited to judge my first Specialty Show in Queensland, and I'd like to thank the Club and its members for giving me this opportunity

I'd like to share some general observations with you, but please remember, these are only my opinions, and, as was quoted at the end of the show, 'we all take the best dog home' and I firmly believe this.

My Best of Breed was a terrific example of what epitomises the Rhodesian Ridgeback – 'strong, muscular, agile and active'. He excelled in breed type and exhibited the heart and lung capacity without which the Ridgeback cannot do his job. This is something that is very important to me as a breeder and now as a judge, and many of the dogs that were unplaced did not exhibit this essential characteristic. I'm sure many of you would agree that we are in danger of losing the forechest and fill in front across Australia, and I judged several dogs that had almost cathedral fronts, which I penalised heavily.

As I mentioned on the day, breeders need to be aware of the size of their dogs, as some were very tall, or tending towards the 'massiveness' that is discouraged in the breed standard – this breed is meant to be active and agile, so a balance between elegance and strength should be sought after. Bigger is not better in this case.

On the positive side, not once did I have to worry about the temperament of a dog, and you should be proud of this achievement. All dogs were in good show condition, very few were overweight, and overall, very few were poor movers, which certainly made Best Gait classes interesting! The dogs that I placed higher were those that moved true with a free and active gait. Almost all had correct scissor bites, but watch this carefully as bad bites are very difficult to eradicate. I also saw quite a few weak underjaws, which spoiled an otherwise pleasant head, but saw hardly any poor feet – again, the Best Footed class was a challenge with so many to choose from!

Finally, while the dog does not run on his ridge, and I did not penalise any for correctness or otherwise (many were incorrect), this is the hallmark of our breed, and if we do not pay attention to this feature, we run the risk of losing good ridges, as has happened in other countries, where they are now struggling to get it back – food for thought.

I'd like to thank my ring steward Janet McGregor, who kept me in line, and my ticket writer, Ellen Nan-Kivell, both of whom did an awesome job. Congratulations go to the Committee for a well run show that ran smoothly - and a beautifully produced catalogue. Thank you also to exhibitors who took my decisions with good sportsmanship and grace, although none can match the excitement of the Challenge bitch winner!
